

To Whom it may concern:

I've been an Electrologist since 2008 practicing on the state of Ct. I received my training at the Electrology Institute of New England.

Electrolysis has helped thousands reach their permanent hair removal needs safely since it is a profession that is regulated by the department of public health.

Please exclude Electrologist from the change of definition of surgery in Bill number 5625. A reasonable request considering tattoo artist are exempt.

Thank you for your fair judgement in this amendment.

Sincerely,

Darlene Burnett
Licensed Electrologist
